

XM Radio is the best product to be offerd to customers in years. I switchched to XM Radio because regular radio is just not providing me with what I need. XM gives me what I want and they should not be punished because regular radio is not giving the consumer what they want. Ask your self a question? Why would people pay for radio if they can get it for free.  
I only have one word to say - Competition!

Please don't mess with a good thing.
